

ADVANCING WATER

ADVANCING WATER

ADVANCING WATER

Garney is all about water. Clean water or dirty water. We move it. We treat it. We store it. We wake up thinking about it. Whatever your water needs, there is one simple solution: Garney.

Our relationship with water didn't just happen. It's been built project by project for over half a century. As we've made the water flow, people across the country have come to depend on us for quality, integrity and the customer satisfaction that comes from getting more than your money's worth. We are one of the nation's leading water and wastewater contractors because we deliver more than water. We deliver excellence.

Garney. Advancing water.

You'll find working with Garney a bit different. We're a hands-on organization. Have been from the beginning. Always will be. Our people don't mind getting their boots dirty. They're smart, tough minded and hard working.

We are 100% employee owned. When you work with one of us, you're working with one of the owners. And people who have the pride of ownership just naturally work a bit harder, a bit smarter and put a whole lot more into making sure the job is done right. Let us put the power of ownership to work on your project.

Our reputation can benefit your project. We are known in the industry for getting it done. We have close relationships with the nation's largest pipe suppliers, so we can get the pipe you need, when you need it. We work closely with equipment manufacturers, subcontractors, and all key players in the water market. Engineering firms respect our integrity and want to work with us.

We take our responsibility to the stakeholders and to the environment very seriously. We are considerate of the concerns of our clients, property owners, engineers, and local residents. We minimize land disturbance and work with landowners, cleaning, reseeding and restoring immediately behind our project crews. We respect the people who put their trust in Garney.

"Caterpillar has a tremendous respect for Garney's hard working, straightforward, and high integrity approach to business. Their employee ownership culture generates a work atmosphere and attitude that companies everywhere should strive to emulate."

Douglas R. Oberhelman
Chairman and Chief Executive Officer - *Caterpillar Inc.*

GARNEY PEOPLE TAKE A VERY PERSONAL STAKE IN SEEING THAT PROJECTS ARE COMPLETED SUCCESSFULLY. IT'S PART OF THE PRIDE OF OWNERSHIP.

GARNEY IS A PROBLEM SOLVER, NOT A PROBLEM CREATOR. WE TAKE THE CONCEPT OF RESPONSIBILITY VERY SERIOUSLY.

MOVING WATER

Every minute of every day vast quantities of water move across the country via Garney pipelines. Water to serve our cities, make our products, sustain our families and build our nation. We're ready to move water for you.

GARNEY'S ANNUAL VOLUME EXCEEDS \$400 MILLION IN REVENUE.

Garney can handle your pipeline or pump station. We work with municipalities of every size, industrial corporations large and small, and private owners of every type to provide drinking water for communities, move wastewater for treatment, and pump effluent for re-use. The more challenging the project, the more we like it.

We understand your profits are on the line. Your customers are depending on you. Give us your tough deadlines; we're ready to develop solutions and save you money. Whether we are providing design-build for the largest and most complex pumping facilities or a smaller, less complex pipeline, we work expertly and efficiently.

TREATING WATER

Advancing water means we have an abiding concern for the quality of water everywhere. While we treat your project with the utmost consideration for your needs and your budget, we also treat water as though every drop counts.

Through our diligence and quality performance, we have become a leader in the construction of top of the line water and wastewater treatment facilities around the country. We have completed flagship treatment facilities in all types of soil, for all sizes of systems from the simplest to the most complex. We take pride in providing treatment projects that are second to none.

We clearly understand the public and governmental issues surrounding the care of water resources today. We can help you get the facility you need, contain the costs effectively and satisfy environmental concerns.

QUALITY WATER TREATMENT FACILITIES FOR SYSTEMS LARGE AND SMALL, SIMPLE OR COMPLEX.

AT GARNEY, ENVIRONMENTAL CONCERNS ARE PART OF THE PROCESS, NOT AN AFTERTHOUGHT.

STORING WATER

The key to advancing water is making certain there's water available when it's needed. That means capturing water and storing it in facilities that fit requirements today and into the future. No one answers your water storage needs better than Garney.

WE BUILD MULTI-MILLION GALLON STORAGE WHEREVER YOU NEED IT, ON-GRADE OR BELOW-GRADE.

Garney is your single source solution for water storage.

Our pricing is competitive and our expertise and experience are unmatched. Whatever the capacity, whatever the challenge, Garney provides the storage facilities that are right for your needs.

Garney expertise gets the job done quickly, efficiently and cost effectively.

Civil work, structural and decorative concrete, buried and exposed piping. We do it all and we do it well. Including site restoration that's considerate of community and adjacent property holder concerns.

Bring us your water storage concepts early. We can help you through the process, saving you time, money and headaches.

CAPABILITY, DEPENDABILITY, COMPETENCE.

When you need to move water, Garney has all you need. Align your project with our strengths. Exceptional safety rankings lower our insurance costs, savings we can pass along to you. Our skilled workforce has what it takes to meet high pressure deadlines. Financial strength assures we'll be with you for the long haul on projects of any size.
