Attachments: COVID-19 Scenario Flow Chart\_English.pdf

Good afternoon, employee-owners:

Below is an update on our COVID-19 response. The first part is additional information and the second part provides answers to the questions that have been submitted.

### **ADDITIONAL INFORMATION:**

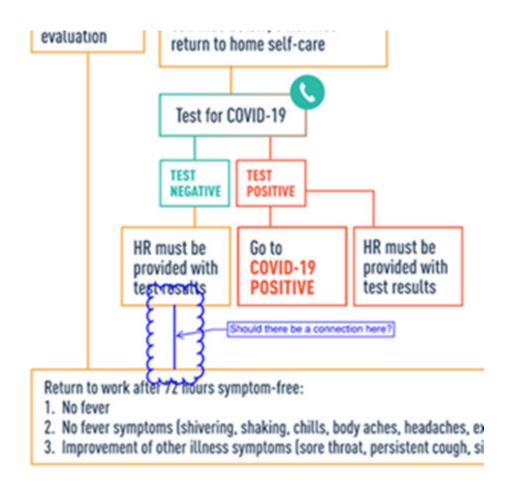

Just a reminder to play it safe when it comes to COVID! Although we can't dictate what employee-owners do
outside the workplace, everyone needs to understand that their behavior can have a significant impact on our
company. If you put yourself in a situation where there is a high-risk of being infected, you then expose your
fellow employee-owners when you come to work the next day. We all own this company so please be smart!
Protect your family at home and at work.

#### **QUESTIONS SUBMITTED:**

1. The flow chart mentions quarantining after travel to a country or state with Level 2 or 3 warning. Considering just the U.S., it's not clear what level each state is currently at. I can't find anything on CDC's website that differentiates between a "health notice" and a "warning" other than this link: (3=Warning, 2=Alert, 1=Watch) Can you help clarify?

ANSWER: The CDC does not regulate each individual state. The CDC has allowed the states to make their own guidelines. There are currently no CDC guidelines on United States travel as it relates to COVID-19. Regardless of where you travel in the United States, we recommend researching the specific area you are traveling, the events/areas guidelines and follow the CDC guidelines to keep yourself protected. You can find the link <a href="here">here</a>.

2. See image below with question:

ANSWER: Yes, there should be a line. An updated copy of the flowchart is attached.

As always, please continue submitting your questions to covid19@garney.com.

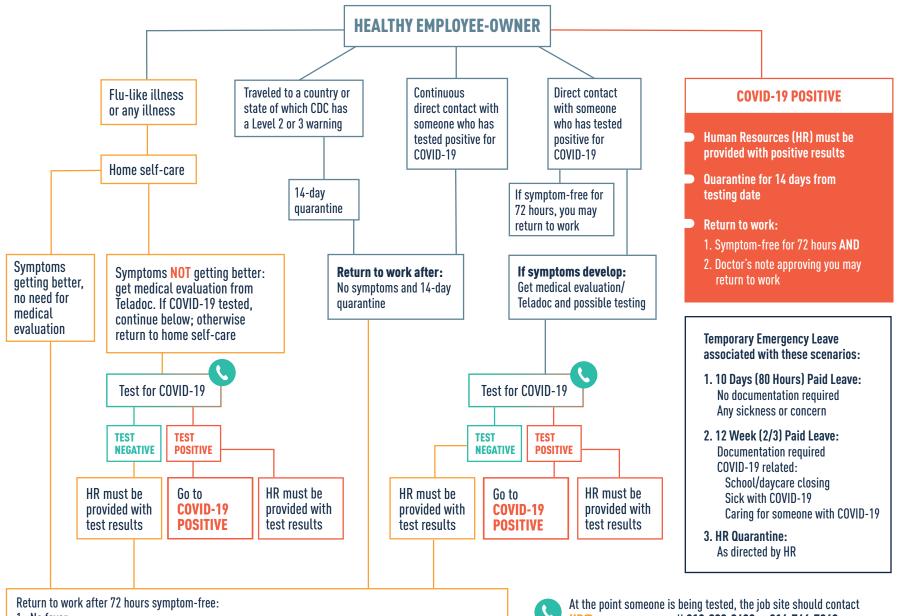

Stay safe and keep your COVID-19 awareness up!
